

Preventive medical care

Important information about the Genki-World-Resident Premium

Stay healthy - Early diagnosis or preventive medical care is the first step. Preventive medical checkups, including those for early detection of diseases, are examinations and tests carried out at an appropriate age and in the absence of medical conditions.

Whether or not such examinations and tests are refundable, depends on their medical necessity which exists for the following examinations (prior approval is not necessary).

Medical examinations

- Dermoscopy for skin cancer detection
- Colonoscopy for colon cancer detection
- Sonography (ultrasonic testing of up to four organs)
- ECG, blood pressure
- Glaucoma detection
- Cancer screening tests (prostate, gynecological diseases: Pap test, mammography)

The following examinations are NOT refundable: Identification of various tumor markers (see laboratory tests).

Laboratory tests

- Fecal occult blood
- Urine dipstick testing
- BC, ESR, blood count and blood count components, WBC differentiation
- Glucose, oral glucose tolerance test (OGTT)
- Cholesterol, HDL, LDL
- Triglycerides
- Uric acid
- Creatinine
- Potassium
- Gamma-GT
- PSA. Ligand assay
- TSH

Vaccinations

100% of all vaccination costs – including work-related vaccinations or vaccinations required to travel abroad – as well as vaccines and any medical expenses incurred as a result of vaccination.

Routine Check ups for children

Examinations for the early detection of diseases in a child (medical history taking, taking of body measurements, examination of the nervous system, sensory organs (audiometry, visual test), skin, chest, stomach, and genital organs).

The following preventive examinations are NOT refundable:

- Laboratory testing for genetic diseases and identification of tumor markers, as well as for various infectious diseases (including AIDS, sexually transmitted diseases, hepatitis)
- MRT, CT and other special medical imaging
